APPLICATION NO. 6031.
Notice of Application for Permission to Appropriation the Public Waters of the State of Nevada.
Notice is hereby given that on the 27th day of March, 1920, in accordance with Section 59, Chapter 52, of the Statutes of 1919, T. H. Chatom and J. J. Vignolo, of Beatty, County of Nye, and State of Nevada, made application to the State Engineer of Nevada for permission to appropriate the public waters of the State of Nevada. Such appropriation is to be made from Spec Spring, at a point in the SW 1/4 of SE 1/4, Sec. 19, T. 12 S., R. 48 E., M. D. B. & M., by means of pipe, and one fortieth cubic foot per second is to be conveyed to SW 1/4 of SE 1/4, Sec. 19, T. 12 S., R. 48 E., M. D. B. & M., by means of pipe and troughs and there used for stock watering purposes. Water not to be returned to stream.
Signed: J. C. SCRUGHAM, State Engineer

BIG BUSINESS AND PUBLIC SERVICE

The vast operations necessary to supply the rapidly increasing requirements of the inter-mountain region for electric power can only be undertaken by great companies amply endowed and directed by the highest ability and experience which money can buy.

The attempt of small units to accomplish great purposes is a failure.

Big business is no longer the bugbear of the American people but in efficiency, duplication of effort, conscienceless service and prodigal waste of resources are the things which threaten our prosperity and contentment.

The conservation and utilization of the great water power resources of the west can be most efficiently carried forward by large public utility corporations having the confidence of investors and the good will of the public whom they serve.

They cannot profiteer.

SWEDISH PARTY MAKING SURVEY

Party of Scientists Leaves Yokohama on Investigation of Kamchatka Country.

(Correspondence Associated Press)

YOKOHAMA, June 22.—An expedition fitted out by the Swedish Society of Anthropology and Geography of Stockholm, has left Yokohama to make a scientific survey of the island of Kamchatka. The work will last for at least two years.

The members of the expedition are scientists from the University of Stockholm and are under the direction of Sven Bergman. They are prepared for a zoological, botanical, ethnographical, geological and geographical survey of the whole peninsula. The collections will be donated to the Swedish Geographical Society and to the University of Stockholm.

Kamchatka is known to have a rich and varied flora and fauna but it is comparatively unknown to scientists. The plant life is particularly interesting as it is unusually extensive for the high altitude and many of the forms belong to regions much further south. Birds and animals are numerous and as far as known are similar to those of Alaska.

FRANCE TO HOLD LECTURE SERIES

"Vacation Conferences" for the Benefit of Educated Public and Americans

(Correspondence Associated Press)

PARIS, July 1.—"Vacation conferences" at the Sorbonne for the benefit of the educated public of France and foreign countries, especially visiting American students of both sexes, will be delivered from July 1 to October 30.

They will be conducted by professors of French universities, the College of France and high schools and have for aim to present the modern aspects of various scientific theories, and to give a general view of modern French life, thought and science. Professor Gaston May, of the University of Paris, will hold three conferences upon "Franco-American friendship and mutual understanding."

ARGENTINE HAS WOOL ON HAND

2,000,000 Unsaleable Because it is of Course Grade, Is Announcement

(Correspondence Associated Press)

BUENOS AIRES, June 24.—The cessation of the demand for coarse grades of wool for army uniforms and the refusal of average people in spite of the high cost of living, to buy clothing made of the coarse grades, has left Argentina with more than 2,000,000 pounds of almost unsaleable wool on its hands, according to a local manufacturer of woollen cloth, interviewed by "La Nacion."

This huge quantity will be increased during the shearing season in July and August. As the production of wool in this country is growing year by year, the problem of selling the coarse grades is considered very serious. One reason for the situation is that formerly Argentine sheep breeders had thought more of the meat than the wool, with the result that their stock became mixed and the consequent wool coarse and not uniform.

FIND DISORDER ALONG BORDER

Conditions in Northern Mexico Characterized as Immoral by Authority

(Correspondence Associated Press)

MEXICO CITY, July 2.—Conditions in the northern border states of Mexico were characterized as immoral and disorderly by Robert V. Pasquiere, financial agent for the Mexican government in the United States, in a statement he has just issued to the Mexican newspapers. Senior Pasquiere said the inscription which appears on sign posts along the roads leading to Tijuana, Lower California, "To Mexico—the road to hell," was accurate. For a few years no one had been able to work with security in Chihuahua and, he added, that "in Juarez, as in Lower California, formerly there was unhindered rapine in all its forms. One single example would suffice to show the immorality that exists there. The gambling concession produced \$11,500 monthly to the government, and the same concessionaires today are offering to pay \$20,000 monthly for the same privilege."

Senior Pasquiere charged that Mexican laborers who crossed the line were being "villainously exploited" by labor agents, with the aid of the Mexican authorities. He likewise attacked the alleged practice of some of the American merchants who furnish office supplies to Mexican officials of making out invoices for double the right amount.

"This fact shows the robbery that is being systematically committed against the national treasury and illustrates to what point official corruption has reached," Senior Pasquiere commented.

SEASICKNESS IN AIR DISCOVERED

Aviator Flying Over Korea Says Plane Pitches Like Sailboat in Gale

(Correspondence Associated Press)

TOKIO, June 21.—Lieutenant Perraro, one of the two Italian aviators who flew from Rome to Tokyo, encountered such rough air conditions while crossing the length of Korea that they made him seasick. The simplest test in the Hakone mountains was unparalled.

"In my entire flying experience," he said, "I have never before met with such conditions. The air was so disturbed over Korea that the machine pitched like a small boat in a heavy swell, and for the first time in my life I knew what it was to be sick. As soon as I reached the straits, where an escort of Japanese destroyers was waiting for me, the air conditions improved, and the rest of my flight in Tokyo, except for the storm in the Hakone mountains, was ideal weather."

DIFFICULT FLIGHT

One of the most difficult parts of his flight to Tokyo, he explained, was between Bangkok and Bangkok, where very heavy fog was encountered making it extremely difficult to keep on the course. Between Jhon and Bangkok, Lieutenant Perraro was forced to follow a train for about three hours in order to keep on the right course.

"The most exciting part of my trip occurred in Asia Minor," he said, "about 100 miles from Aleppo I was subjected to heavy machine gun fire by the Arab rebels. Again in Baluchistan, when I was forced to land on account of engine trouble, I was captured by the natives, imprisoned and not allowed to leave until I succeeded in establishing my identity. They thought I was a British aviator, but when they learned I was an Italian I was liberated."

WATCH REPAIRING
